Report on the Extension Lecture organised by the Department of Geography, Milli Al-Ameen College (for Girls) held on 19.12.2024 titled ‘Fundamentals of GPS and its application’

The department of Geography in collaboration with the IQAC of the Milli Al-Ameen College (for Girls) organised its first extension lecture on ‘Fundamentals of GPS and its application’ in the Virtual Room of the college on 19.12.2024. The invited resource person for this event was Ms. Atrayee Biswas, Lecturer, Department of Geography, The Bhawanipur Education Society College. The event started with a brief introduction of the speaker by the Head of the Department, Dr. Debika Banerji. This was followed by the lecture where Ms. Biswas explained to the students how navigation is an important component of human existence as we see how it has changed from the ancient times to the current scenario. With the ingress of technological advancement, the navigation tools became easier for everybody to access. From here the speaker elaborated on the Global Navigation System and how it functions, its various components and the mechanism it follows to collect data. She even correlated the technology with day to day examples which the students related to. Finally, she illustrated the topic with field examples and how to use them to collect data and plot them. The students were immensely benefitted as the Resource person showed how to gather the data for their field work as mentioned in their syllabus.

The lecture was concluded with a question-and-answer round. The students asked pertinent questions about data privacy and monitoring that was relevant to in the digital age. Another student questioned about Indian satellites and why were we still reliant on other countries for the navigation data.

The session was concluded with Ms. Rounaque Saba, Department of Geography, Milli-Al Ameen College (For Girls) giving the vote of thanks. The lecture was highly beneficial and students learnt a lot from the discussions.
