Report on Environment Day celebration on 06.06.2023

Place – Milli Al- Ameen College (For Girls)

Date – 06.06.2023

On 06.06.2023, Milli Al-Ameen College (For Girls) in collaboration with IQAC celebrated **‘World Environment Day 2023’** organized by Departments of Science, Commerce And Geography.

The theme of the World Environment Day 2023 was **Solutions to Plastic Pollution**. The students from various departments and the teachers of the college participated in the program. The students presented poster based on the theme and also interacted with local people to suggest them about various alternatives to plastics. The purpose was to involve local people in awareness mission and enlighten them how they can contribute to a change. The students explained the local people how they can make a change themselves. The event was graced by our principal Dr. Sunanda Haldar and many other teachers.

The most challenging job here was to engage the common people in an interaction and making them understand the gravity of the situation. The teachers and students gave examples from the locality for a better understanding for the local people. The discussion was also about how we escape from our own responsibility by blaming each other and the authorities, whereas the solution lies in each one of us being responsible, sensible, and aware. The different types of plastic polluting the locality were shown to the local people on spot and they were encouraged to get rid of such practices polluting the locality. Very simple solutions that can make a change like using dustbins, reducing plastic usage were brought into limelight. The local people were interested to contribute towards a plastic free zone. Slowly but steadily, such endeavours from the college are expected to make a change. The event was a success owing to tireless effort of the participants.
